Vision:

Graduates from our program will be able to think as chemists, critically evaluating scientific information and solving scientific problems.

Mission :

To cultivate the moral and ethical values.

To enhance the practical knowledge of chemistry in multidisciplinary fields. To enhance the quality education in applied chemistry To develop critical thinking skills and acquire a foundation of basic chemical knowledge necessary for a career in chemistry. To instruct the innovative techniques for development of modern educational technology in lecture and lab courses. To increase the opportunities and greater participations. Laboratory chemist in industries and companies that deal with chemicals, food and beverage, cosmetics, pharmaceuticals, oil and petroleum, mineral and metals, textile, agricultural products. pulp and paper, analytical chemistry services, and quality control

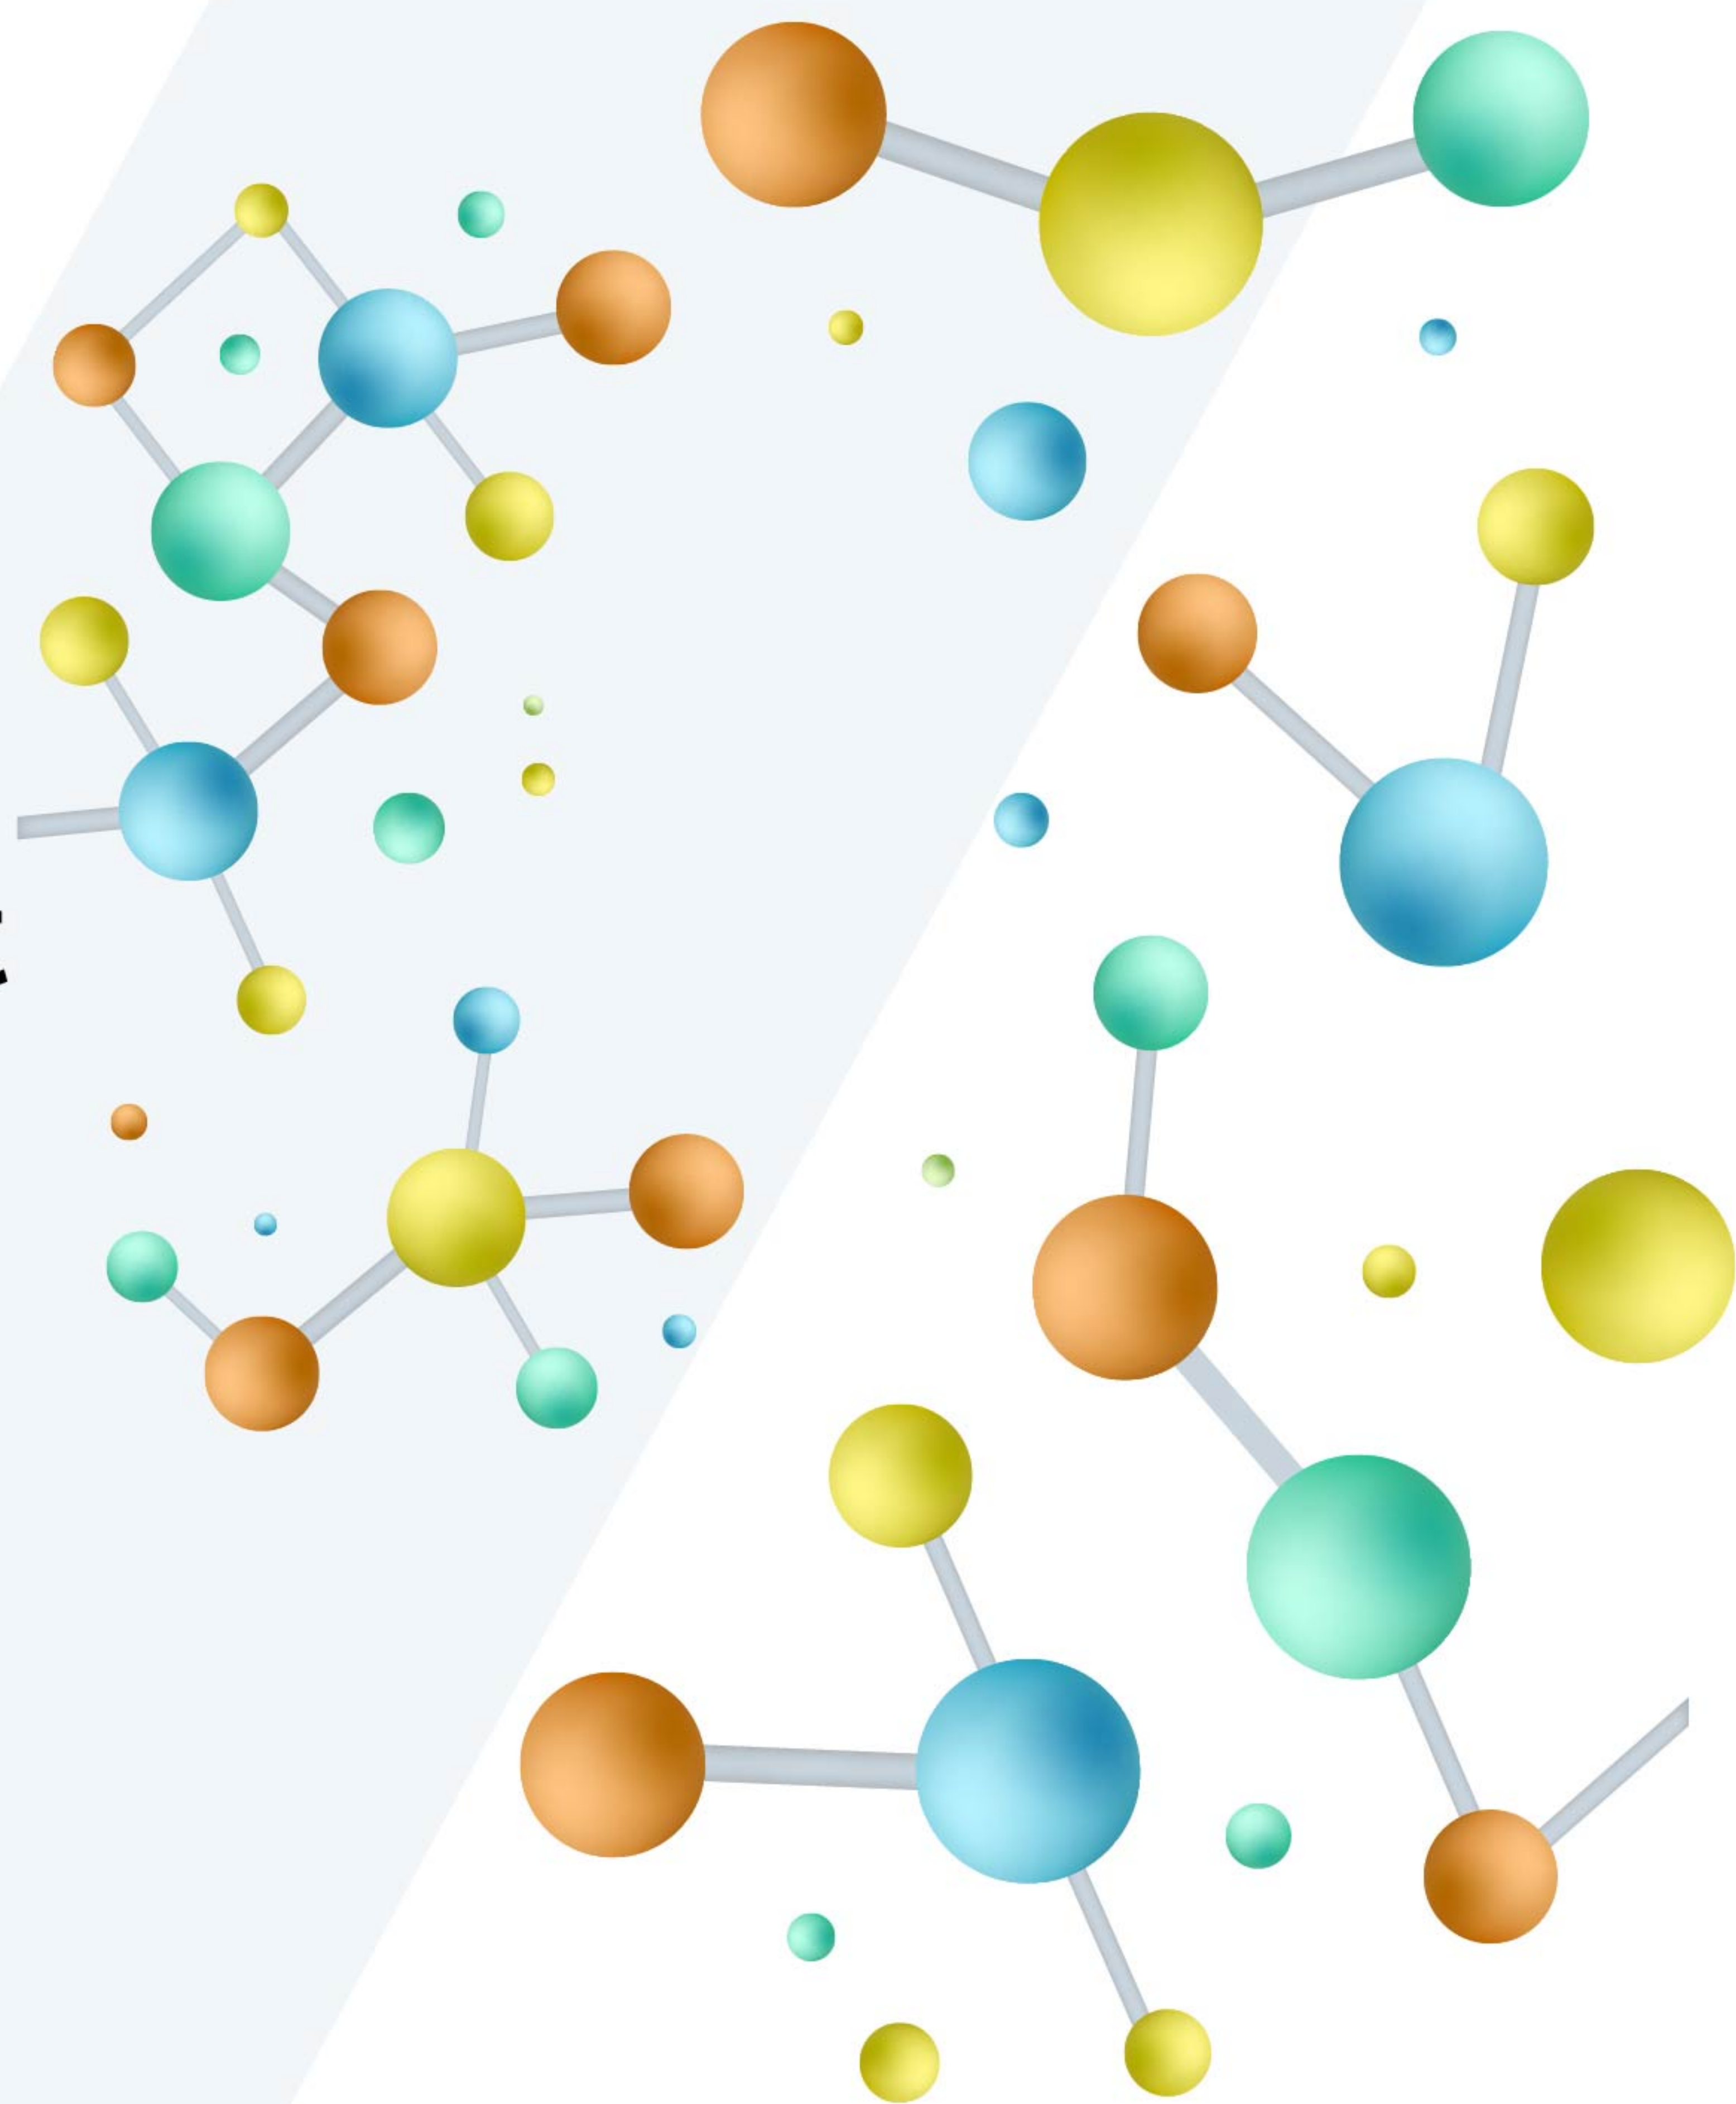

B.Sc Chemistry

B. Sc Chemistry is a three-year program that aims to produce graduates who comply with the current qualification requirements of professional chemists for local and overseas employment and entrepreneurship. The program aims at building a strong analytical and technical background for employment in a variety of fields.

Career Opportunities

Chemistry is the study of chemical and element compositions and how each chemical interacts with its environment. Its study has led to an expansion of current, important capabilities in agricultural, industrial, medical and technological developments.

- Analytical chemist
- Biotechnologist
- Chemical engineer
- Clinical biochemist
- Forensic scientist
- Chemical technician
- Agricultural scientist
- Environmental scientist
- Chemistry teacher
- Toxicologist
- Medical Scientist
- Pharmacologist
- Materials scientist
